### Notes:

- All performance values are referenced to rear output feed flange.
- Midband, 20°C, Clear sky conditions, <7.5 g/m<sup>3</sup> water vapor, +/-5K.
- G/T shown for mid-band and is typical for single thread LNA connected directly to the feed flange and does not include post LNA contributions.
- Antenna pattern sidelobes are compliant to ITU-R S.580-6 and ITU-R S.465-5 recommendations, 10% of sidelobes may exceed the specification where applicable.
